REJUEVA'
Cosmetic Dermatology

I have requested that Dr Michael Brown attempt to improve my facial expression lines and wrinkles with Botox Cosmetic or Dysport. I understand these medications are used for medical purposes, are safe, and are now used for cosmetic reasons. The injection of minute amounts will cause temporary weakening of the facial muscles. Although the results are usually dramatic, I understand the practice of medicine is not an exact science and results may vary and no guarantees can or have been made concerning expected results.

I understand the solution is injected with a tiny needle into the muscle and results may take up to a week to be seen. The results usually last about 3 months. Side effects are minimal and may include bruising, headache for 1-2 days, and/or slight swelling. Rarely an adjacent muscle may be affected or an eyelid droop may occur and I am to inform the doctor immediately. If Dr. Brown has not heard from me within 2 weeks of the injections, he can assume my results are satisfactory.

I also understand that insurances do not cover cosmetic procedures and payment is due in full on the day of the procedure.
